

ADA-Guest

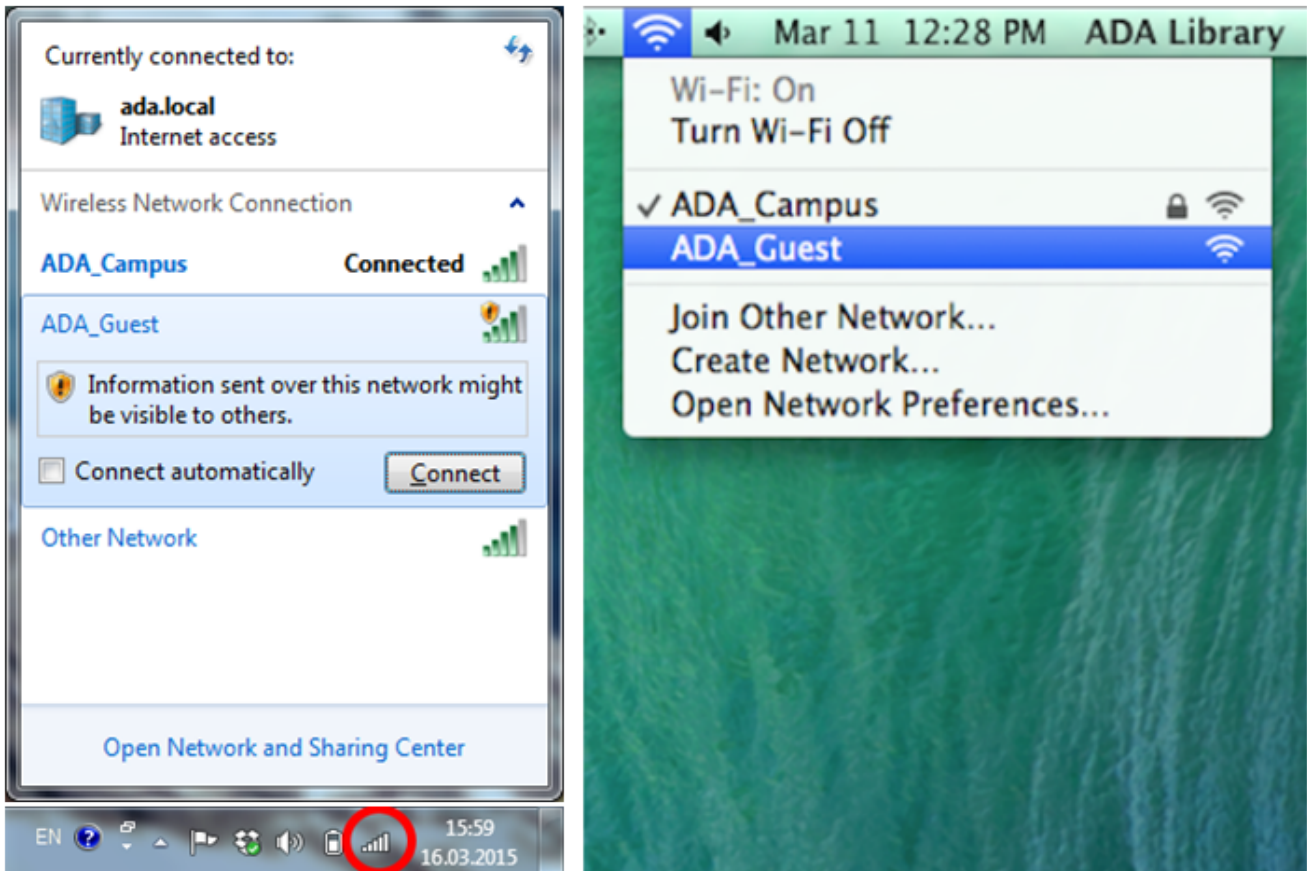

Wi-Fi Connection

Manual

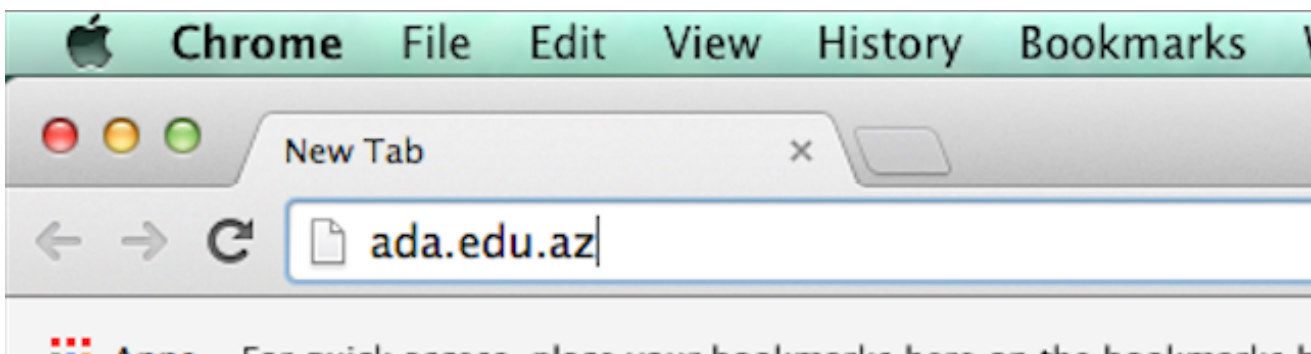

Step 1.

- **(Windows).** Click on the Internet icon in task bar and choose “ADA_Guest” as Wi-Fi network and click on “Connect”.
- **(Mac).** Click on the Wi-Fi icon in menu bar and choose “ADA_Guest” as Wi-Fi network. If there is no such network, wait until it appears, it will take probably 10-15 seconds.

Note: Next steps are the same in both Windows and Mac.

Step 2. Open a browser and type “ada.edu.az”. It will open error page with connection problem. Don’t worry, proceed to Step 3.

Step 3. Click on Advanced.

Your connection is not private

Attackers might be trying to steal your information from **securelogin.arubanetworks.com** (for example, passwords, messages, or credit cards).

[Back to safety](#)

This server could not prove that it is **securelogin.arubanetworks.com**; its security certificate expired 474 day(s) ago. This may be caused by a misconfiguration or an attacker intercepting your connection. Your computer's clock is currently set to Wednesday, March 11, 2015. Does that look right? If not, you should correct your system's clock and then refresh this page.
